Professional Summary

Full Stack Web Developer specializing in **Python (Django)**, **Django REST Framework**, and **React.js**. Experienced in building scalable web applications, developed multiple projects. **Active open-source contributor**

Technical Skills

Languages: Python, JavaScript, SQL, Java , C++ , C

Frontend: React.js, Redux, Redux Toolkit, HTML5, CSS3, SCSS, Tailwind CSS, Axios, Styled Components , JSON

Backend: Django, Django REST Framework, REST APIs, JWT Authentication, Role-Based Access Control, Django ORM

Databases: PostgreSQL, MySQL

Tools and Platforms: Git, GitHub, Docker, Postman, Swagger/OpenAPI, VS Code, Razorpay, npm

Concepts: CRUD Operations, Authentication and Authorization, API Documentation, Payment Integration, Database Query Optimization, Responsive Web Design, State Management

Open Source Contributions

Kerala Toddy Finder, KERALACODERSCAFE

GitHub Contributors

React.js, Django REST Framework, PostgreSQL

- Contributed frontend and backend features to an open-source platform using React.js, Django REST Framework, and PostgreSQL.
- Implemented interactive Kerala map navigation, responsive UI improvements, and Explore page enhancements.
- Developed User Profile CRUD APIs and Favorite Shops functionality with Django models, serializers, REST API endpoints, permissions, and personalized favorite status indicators.
- Improved query performance using `select_related` and integrated backend data with reusable frontend components.

Projects

E-Learning Platform

GitHub

React.js, Django REST Framework, PostgreSQL, Razorpay, JWT, Swagger/OpenAPI

- Built a full-stack Learning Management System with dedicated Student, Instructor, and Admin portals using React.js, Django REST Framework, and PostgreSQL.
- Developed 80+ REST API routes across authentication, course management, curriculum, assignments, quizzes, certificates, payments, chat, community posts, reports, support, and admin workflows.
- Designed a modular Django backend with custom user roles, 34 database models, serializers, permissions, and API documentation using Swagger/OpenAPI.
- Implemented JWT authentication, token refresh, OTP email verification, password reset, protected frontend routes, and role-based access control for Student, Instructor, and Admin users.
- Built social learning features including direct chat, group chat, community posts, polls, user profiles, following, and report moderation.
- Optimized backend data access with Django ORM relationships, `select_related`, pagination, and reusable serializers to improve dashboard and listing API performance.

Arts Management System

Add correct GitHub link

React.js, Django REST Framework, PostgreSQL, JWT

- Developed a full-stack college arts festival management platform with role-based dashboards for Admin, Principal, Teacher, Judge, and Student users.
- Implemented JWT authentication, role-based access control (RBAC), token refresh, API rate limiting, and secure authorization workflows across frontend and backend services.
- Built judge and admin workflows for score upload, score updates, result publishing, participation tracking, schedule management, and Excel export.
- Optimized dashboard, result, gallery, schedule, and participation APIs using `select_related` and `prefetch_related`.
- Integrated Swagger/ReDoc API documentation and media upload support for event images, profile photos, gallery images, and attachments.

Education

Bachelor of Computer Applications (BCA), Kannur University

2023–2026

WMO Imam Gazzali Arts and Science College, Wayanad, India

CGPA/OGPA: 7.2/10 | First Class | 72.27%
